

Be a Pioneer in
Frequency Technology
and Celebrate Life.

RYSEUP
Independent Affiliate

At RyseUp, we are driven by the desire to help individuals and organizations connect with their life force, what Traditional Chinese Medicine (TCM) has for millennia identified as „Qi“ (Chi). Through our leading-edge frequency products, we make the power of frequencies accessible to everyone, enabling you to experience a new state of being and celebrate life.

**EASY TO USE. FLEXIBLE
AND ACCESSIBLE.
WHENEVER. WHEREVER.**

Harnessing the Power of Nature and Technology: The RyseUp Wearable

Its name is its functionality!

Wear it on a lapel or in a pocket, purse, or pocket. You will take all the benefits of RyseUp PEMF+ power with you wherever you go to stay in tune with your Biofield in ways never before possible. Just access the user-friendly RyseUp App, connect with your device, and be ready for a powerful collection of wellness programs that seamlessly integrate into your daily routine, all at an affordable price.

Start your
wellness
journey now!

How RyseUp works:

All Life Is a Biofield.

The United States National Institutes of Health have posted more than 400 scientific papers investigating the functionality and importance of the Biofield that emanates from all living things: You, your pets, and even your plants!

Frequencies Resonate with Your Biofield.

RyseUp devices and programs are designed to resonate with your Biofield. PEMF+ (pulsed electromagnetic fields) strive for a harmonious wellness resonance with your electromagnetic field, your Biofield.

RyseUp Wellness for All that Lives.

All life generates the life force of a biofield. For more than 4,000 years, Traditional Chinese Medicine has recognized this Biofield as „Chi“ or „Life Force.“ RyseUp resonates to promote rest and relaxation and other benefits of a wellness regimen.

Everything is possible
with frequencies.

Product and Use Disclaimer:

The RyseUp devices and programs create a "PEMF+" (Pulsed Electromagnetic Field plus Sound) transmission, a technology developed and registered by RyseUp. The RyseUp pulsed electromagnetic programs operate as a feature of the emerging field of "frequency science." Frequency science has long been recognized by Traditional Chinese Medicine (TCM) and our new understanding of the homeodynamics, an example of which is the recent study of the "biofield." The biofield has been reported by the U.S. NIH (National Institutes of Health) as an electromagnetic field emanating from all living organisms: humans, animals, and plants. This emerging field of study intends to provide a scientific foundation for understanding the complex homeodynamic relationship of living systems. Currently, the U.S. National Institutes of Health posts more than 400 academic papers investigating the biofields of living organisms, focusing on the human biofield. RyseUp frequencies and devices have been designed as wellness devices and programs to provide a low-level energetics experience of the interaction between the RyseUp devices and programs as they resonate with the biofield. Although many have enjoyed a wellness experience with RyseUp—promoting rest and relaxation, meditation, and other moderating energetic experiences—it must be stressed that this area of energetics still is theoretical and should not be relied upon to replace consultation with your physician or other wellness practitioner. RyseUp devices are not intended to diagnose, treat, or prevent disease, disease-like or other medical conditions. If you are under the care of a doctor or other healthcare practitioner, you should consult your doctor or wellness advisor before using RyseUp. There are no reports of contraindications when using the RyseUp PEMF+ technology, but because this is an electromagnetic device, it should not be used by anyone with a metal implant (other than titanium, which is non-magnetic) or anyone with a pacemaker, an implantable cardioverter defibrillator (ICD), a cochlear implant, intrathecal pump, insulin pump, spinal cord stimulator, or similar medical device. Further, and out of an abundance of caution, we do not recommend the use of RyseUp devices by pregnant or lactating women or anyone under the age of 18 (except by parental permission and/or the permission of a consulting physician). When using RyseUp devices and programs, hydrate for maximum effectiveness. Be advised that not all frequencies work for all people. Your body will tell you what works for you!
